Dear Sir:

The references listed in the attached PTO Form 1449(s), [at least one of which was provided by an Examiner(s) handling a related patent application(s)], copies of which are attached, may be material to examination of the above-identified patent application. Applicants submit these references in compliance with their duty of disclosure pursuant to 37 CFR §§ 1.56 and 1.97. The Examiner is requested to make these references of official record in this application.

Art Unit

2135

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 December 2001.
2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-24 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☐ Claim(s) _____ is/are allowed.
6) ☒ Claim(s) 1-24 is/are rejected.
7) ☐ Claim(s) _____ is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

RECEIVED
JUL 30 2004
Technology Center 2600

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 2-3
4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____

DETAILED ACTION

Information Disclosure Statement

For IDS (paper #2), the IDS fails to comply with 37 CFR 1.98 (a)(11), which requires a list of all patents, publications, or other info submitted for consideration by the Office. It has been placed in the application file, but the info therein has not been considered.

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
2. Claims 1, 3-6, 8-11, 13-16, and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drake et al, hereinafter "Drake", (US/6347374A1).
3. As per claims 1, 3, 6, 8, 11, 13, 16, 18, and 21, Drake discloses the "Event Detection" invention, which includes a method for analyzing a network, scanning the network, and detecting intrusions in the network. The system comprises: Collector (agent), Parsers, Generic File Transfer Utility (GFTU), Inserter, Database, Expert System Engines (ESG) (Host Controller), and Manager/configuration GUI (Zone Controller) (See Fig 1). The collector is an agent running on computers on the network and there are different collectors associated to the applications monitoring (Col 9 lines 53-59). GFTU, located on the client computer, sends data files, such as log files or other files depending on

the application to the Parser (Col 9 line 65 to Col 10 line 4). The Parser is located on the remote network collecting the data files, parses, and then passes the data files in Virtual Record format readable by the ESG to the Inserter (Col 7 lines 38-54, and Col 10 lines 21-32). The Inserter stores the records in the database. The ESG has many functions or controllers, such as deriving database information to detect events, Hard-Coded processor, Execution array-based processors, and Rule-based interpreters (Col 11 lines 7-17, line 52 to Col 13 line 67). ESG utilizes the controllers above to analyze and detect intrusion (Col 7 line 51, and Col 11 line 53 Col 12 line 67), and creates events model and report for the network (Col 15 lines 59-62). The Manager/configuration GUI takes all the output data from ESG and generates reports or statistical data accordingly (Col 17 lines 1-24). The Manager/Configuration GUI also has admin capability to configure rule-based triggers to the event. However, Drake does not teach the Zone Controller specifically. Nevertheless, Drake teaches the ESG, which has the HC and ZC functionalities as claimed and part is in the Manager/Configuration GUI (See above citing). Therefore, it is obvious at the time of the invention for one of ordinary skill in the art to separate both components to minimize the processing time and load.

4. As per claims 4, 9, 14, and 19, Drake discloses the system as recited in claim 1, wherein the host controllers and the zone controllers operate based on business rules (Col 17 lines 15-24).

5. As per claims 5, 10, 15, and 20, Drake and disclose the system as recited in claim 1, wherein the business rules are user-configurable (Col 17 lines 15-24).
6. As per claim 22, claim 1 rejection basis is applied. Further, Drake discloses a method to configure and identifying the business rules applicable to the network users and services (Col 5 lines 36-60 and Col 17 lines 1-24).
7. Claims 2, 7, 12, 17, 23, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drake et al, hereinafter "Drake", (US/6347374A1) in view of Eschelbeck (US/6553378B1).
8. As per claims 2, 7, 12, and 17, Drake discloses the system as recited in claim 1. However, Drake does not teach the host controllers are further capable of cyber cop services. Nevertheless, Eschelbeck discloses the "System and process for reporting network events with a plurality of hierarchically-structured databases in a distributed computing environment" invention, which teaches a method of analyzing, detecting, and response to a network node anomaly, such as intrusion, virus attack, and network attack (See Fig. 2). The system includes agents, event detectors and analyzer, and root snap-in agent. The event responding includes forwarding a snap-in component to control the anomaly (Col 7 lines 52-63 and Col 10 line 34 to Col 12 line 8). One of the snap-in

components is the cyber cop service (Eschelbeck, Col 5 line 34). Therefore, it is obvious at the time of the invention was made for one of ordinary skill in the art to incorporate the teaching to resolve the problem in the network.

9. As per claims 23 and 24, Claim 1 rejection is incorporated. However, Drake does not teach the anti-virus services. Nevertheless, Eschelbeck teaches the implementation of the anti-virus services (Col 7 lines 1-13). Therefore, it is obvious at the time of the invention for one of ordinary skill in the art to incorporate the service to check the data integrity in the network.

Conclusion

1. Any inquiry concerning this communication from the examiner should be directed to Linh Son whose telephone number is (703)-305-8914 or Fax to 703-746-9821.
2. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor Kim Y. Vu can be reached at (703)-305-4393. The fax numbers for this group are (703)-872-9306 (official fax). Any inquiry of general nature or relating to the status of this application or proceeding should be directed to the group receptionist whose telephone number is (703)-305-9600.
